Career summary

I seek to understand how Earth's climate is changing in the context of natural variability, with a particular interest in the water cycle. I take a holistic approach to my research, combining information from modern observations, climate model simulations, and natural archives of long-term climate ('palaeoclimate proxies'). I use laboratory techniques to produce new water isotope and palaeoclimate proxy data. I use high-performance computing to run fully-coupled earth system models and analyse climate data using advanced statistical methods. I have experience with complex data visualisation, machine learning, and forward and inverse modelling methods in R and Python (e.g., xarray, dask, pyleoclim) environments.

Teaching and communication are integral parts of my research ethos. I am passionate about sharing my research through undergraduate teaching, postgraduate teaching, and researcher supervision, as well as scientific meetings and public outreach. I am dedicated to the academic and personal welfare of my students, and as a result have a proven record of teaching excellence.

Professional appointments

2025– **Australian Research Council Discovery Early Career Researcher Award (ARC DECRA) Fellow**, *School of Physics, Chemistry and Earth Sciences, Adelaide University, Australia.* Producing and analysing new precipitation stable isotope, tree ring isotope, and climate model data for a holistic understanding of the Australian water cycle and how it is changing.

2021–2025 **ARC Centre of Excellence for Climate Extremes Research Fellow**, *Research School of Earth Sciences, Australian National University, Australia.* Investigating the drivers of droughts.

2019–2021 **Postdoctoral Research Associate**, *Department of Earth and Planetary Sciences, Washington University in St. Louis, USA.* Using water isotope observations, proxy records, and model simulations to investigate forced and internal variability in ocean-atmosphere circulation.

2018–2019 **Marine Geoscientist**, *Geoscience Australia, Australia*

Education

2015–2019 **PhD in Climate Science**, *The University of Adelaide, Australia* "Terrestrial archives of Australia's late Quaternary climate". ***Awarded Dean's Commendation for Doctoral Thesis Excellence.***

2015–2019 **Bachelor of Science with First Class Honours**, *The University of Adelaide, Australia* ***Awarded James Barrans Prize for top graduating earth science major.***

Competitive Research Funding

2025–2028 Australian Research Council Discovery Early Career Researcher Award DE250100071 "*Quantifying Australia's long-term risk of rainfall extremes*". *AU$438,335*

2025–2026 National Computational Infrastructure (NCI) Merit Allocation Scheme "*The role of Indo-Pacific SST variability in global drought occurrence*". *1750 kSU on* Gadi *supercomputer, equivalent to AU$70,000 at official NCI rate*

2025 L'Oréal-UNESCO For Women In Science Fellowship. *AU$25,000.*

2025 Adelaide University Research Equipment Support Scheme. *$AU12,000*

2025 Adelaide University Environment Institute Research Funding Scheme "*A tree ring analytical facility to constrain decadal-scale risk in Australia's rainfall extremes*". *AU$28,130*

2024 Swiss Academy of Sciences and Chinese National Academy of Sciences to fund workshop "*Global-scale hydroclimate synthesis of the Common Era"*, Nottingham, 2024. *US$14,500*

2023 Australian Institute of Nuclear Science & Engineering (AINSE) Early Career Researcher Grant ALNGRA2205 "*Understanding the nature and drivers of spatial and temporal variability in the isotopic composition of precipitation across Australia*". *AU$10,000 + analyses in kind*

2015–2019 AINSE Postgraduate Research Award ALNSTU11873 "*Assessing terrestrial climate variability over the last glacial-interglacial transition* ". *AU$30,000 + analyses in kind*

Awards and distinctions

Selected academic awards & scholarships

2025 South Australian Tall Poppy award

2024 KSC Campbell Prize for Excellence in Earth Sciences teaching at the Australian National University

2023 Australian Research Council Centre of Excellence for Climate Extremes prize for best paper published by an early-career researcher

2022 EarthCube Early Career Researcher award

2019 Fame-Lab Australia national semi-finalist, *Science communication competition*

2017 Esther Bright Prize, *Merit-based award to fund international conference attendance*; Australian Institute of Nuclear Science & Engineering (AINSE) International Travel Scholarship; University of Adelaide Research Abroad Scholarship

2016 Geological Society of Australia prize for best student presentation (oral) *at the Australian Earth Sciences Convention*

Adelaide University Graduate Union R. C. Heddle Award, *awarded annually to one doctoral candidate (from total cohort ~2000) at the University of Adelaide*

Walter and Dorothy Duncan Trust Award, *merit-based award for international conference attendance*

2014 Cooperative Research Centre for Landscape Evolution scholarship, *for outstanding research in physical geography*

Selected invited seminars and keynote talks (funded)

2025 University of Adelaide, School of Physics, Chemistry and Earth Sciences

2024 University of Cambridge, Department of Geography

Tropical hydroclimate variability in the Quaternary (workshop; keynote speaker)

The University of Sydney, School of Geosciences

2023 Past Global Changes (PAGES) Topical Science Meeting, Potsdam (keynote speaker)

2022 Paleoclimate Advances Webinar Series, CESM Paleoclimate Working Group

Australian National University, Research School of Earth Sciences

2021 University of Hawai'i, International Pacific Research Center

Columbia University, Lamont-Doherty Earth Observatory

2018 Australian National University, Research School of Earth Sciences

Invited conference presentations

2027 **Falster, G.** & Hydroclimate2k Project Members: New insights into Common Era global water cycle variability from the Hydroclimate2k database. *Invited talk to be given in "*Multi-proxy perspectives of monsoon-to-polar climate connectivity*" session at the International Quaternary Association Congress, India* (oral).

2025 **Falster, G.**, N. Abram, S. Wong, Z. Gillett: Paleoclimate-informed model simulations to test the link between tropical Indo-Pacific SST variability and mid-latitude megadroughts. *Invited talk in "*Climate of the Common Era*" session at the AGU Annual Meeting, USA* (oral). Link to abstract.

2024 **Falster, G.**, B. Konecky, S. Stevenson, S. Coats: New insights into the Pacific Walker Circulation from an 800-year-long water isotope-based reconstruction ensemble. *Solicited presentation in "*The atmospheric water cycle: processes, dynamics, isotopic tracers, and characteristics*" session at EGU General Assembly, Austria.*

2022 **Falster, G**., N. Wright, S. Coats, N. Abram: No anthropogenic change in the frequency or severity of Australian multi-year droughts compared with the past millennium. *Australian Research Council Centre of Excellence for Climate Extremes Annual Meeting, Australia* (oral).

2020 **Falster, G.**, B. Konecky, M. Madhavan, S. Stevenson, S. Coats: Fingerprinting the Pacific Walker Circulation using precipitation $\delta^{18}O$. *Invited talk in "*The atmospheric water cycle: processes, dynamics, isotopic tracers, and characteristics*" session at the AGU Fall Meeting, USA* (oral).

Scientific leadership, service, and outreach

Scientific leadership

2025– Hydroclimate2k project leader
Facilitating compilation of a comprehensive multi-archive multi-proxy database of hydroclimate proxy records for the Common Era

2022– Past Global Changes (PAGES) 2k Network Coordinator
Planning and facilitating global collaborations to understand hydroclimate variability of the past 2000 years—informing anthropogenic changes to the climate system and hence likely future change.

2021–2024 PAGES Early Career Network (ECN) Steering Committee
The ECN supports research and development activities of >1000 early-career palaeoclimate scientists from >70 countries – with particular focus on researchers from countries not traditionally well-represented in international conferences and collaborations.

2020– Major grant reviewer for US NSF Paleoclimate Program (GEO directorate and P4CLIMATE) & Australian Research Council (Future Fellowships, DECRAs, Discovery Projects)

2020–2022 Scientific Program Committee for the PAGES Young Scientists Meeting

Service to academic community

2025– University of Adelaide Early to Mid Career Researcher committee

2021– Session chair/convenor at major international conferences
*Including "*Water Isotope Systematics: Improving Modern and Paleoclimate Interpretations*" at AGU Fall Meeting; "*Studying the climate of the last two millennia*" at EGU General Assembly; "*Terrestrial hydroclimates: towards quantification and climate model comparisons*" at INQUA Congress*

2019– Reviewer for *Nature, Nature Geoscience, Nature Communications, Journal of Hydrology, Geophysical Research Letters, Journal of Limnology, Boreas, Journal of Climate, Paleoceanography Paleoceanography and Paleoclimatology, Climate of the Past, Communications Earth & Environment.*

2023–2025 Australian Research Council Centre of Excellence for Climate Extremes (ARC CLEX) Early Career Researcher Committee chair

2022–2024 Australian National University Research School of Earth Sciences Seminar Committee

2022–2023 ARC CLEX Culture & Diversity Committee
Mentor at Australian National University Women+ in STEM Leadership Conference

2022 Australian National University Research School of Earth Sciences Engagement Committee

2020–2022 PAGES Open Science Meeting Diversity Committee

2016–2019 Australasian Quaternary Association (AQUA) Treasurer

2018 AQUA Biennial Conference local organising committee

Outreach, policy, public science writing, and other contributions

2026– Selected to Australian American Leadership Dialogue 'Young Leadership Dialogue'
A diplomatic initiative bringing together emerging international leaders in government, enterprise, technology, media, education and the community to review and refine the parameters of the Australian-American relationship

2025– Science and Technology Australia 'Superstar of STEM' (one of 60 female and non-binary STEM professionals selected to a) become high-profile role models inspiring future generations and b) shift the public perception of STEM experts) *Link to profile*

2023– Participant in 'Letters to a Pre-scientist' pen pal program

2023–2024 *The Conversation* articles about atmospheric influences on extreme rainfall events and the possibility of Australian megadroughts

2023 European Geosciences Union blog post about the Pacific Walker Circulation. *Link to blog post*. *Shortlisted for EGU Best Blog Post of 2023*
Submission to Australian Government Climate Change Authority Issues Paper.

2021 Panellist on Washington University in St. Louis 'Climate Conversation: Extreme Weather Events' public Q&A event

2018 Australian National Youth Science Forum 'Meet a Scientist' program
Australian National Science Week: exhibitor at 'Science in ACTion' school event

Media presence

Radio, television, and online media presence regarding climate science topics including: global and regional weather and climate change; nature and causes of droughts; individual extreme weather events; long-term climate variability. See for example *Guardian article about my research into Australian droughts*

Teaching and supervision

Undergraduate and postgraduate teaching

2025– University of Adelaide GEOLOGY3505 – *Earth Systems History*. *Third-year undergraduate course focusing on interactions between the atmosphere, biosphere, and geosphere.*

2025– University of Adelaide GEOLOGY2505 – *Geochemistry*. *Second-year undergraduate course focusing on the chemistry of the natural world, including practical and theoretical geochemistry.*

2022–2024 Australian National University EMSC1006 – *The Blue Planet*. *First-year undergraduate course providing a broad introduction to Earth system science. I taught ~25% of this course, including co-leading a two-day field trip to the Australian Alps. My Student Evaluation of Learning and Teaching (SELT) score for overall teaching quality was 4.5 out of 5.*

2022–2024 Australian National University EMSC3019 – *Coral Reef Field Studies*. *Third-year intensive field course providing students with advanced knowledge of coral reef environments. I taught ~30%, with most content delivered on the Great Barrier Reef. My SELT score for teaching quality was 4.9 out of 5.*

2024 Australian National University ARCH8032 – *Introduction to Archaeological Science* (guest). *Masters course introducing students to archaeological methods. I taught isotope methods for constraining climate variability, in an archaeological context.*

2023–2024 Australian National University EMSC4122 – *Analytical Methods* (guest). *Postgraduate course in laboratory methods for physical geography. I taught advanced water isotope systematics, analysis of water isotopes, and use of water isotopes for understanding water cycle processes.*

2023 ARC Centre of Excellent for Climate Extremes Winter School. *Intensive course for Australian climate science graduate students. I co-taught one day of the winter school, focussed on long-term climate dynamics (lectures and two practical activities).*

2019 Washington University in St. Louis EPSc486 – *Paleoclimatology* (guest). *Advanced paleoclimatology course for postgraduate students & fourth-year undergraduate students.*

Undergraduate researcher supervision

2026– S. Larter-Conway, Adelaide University, *Honours, primary supervisor*

2024–2025 D. Yoo, Australian National University, *Honours, co-supervisor*
M. Thompson, Australian National University, *Honours, co-supervisor*
2023 B. Leibold, Australian National University, *undergraduate research, primary supervisor*
A. Huang, Australian National University, *Honours, co-supervisor*
L. Nicholls, Australian National University, *undergraduate research, primary supervisor*
2021–2022 A-F. Morfiadakis, Australian National University, *undergraduate research, primary supervisor*
F. Perlmutter, Washington University, *undergraduate research, primary supervisor*

PhD supervision

2025– A. Matthias, Adelaide University (PhD, associate supervisor), *Understanding the long-term climate history of Kangaroo Island (Australia) with new speleothem records*
2023– O. Medd, The Australian National University (PhD, associate supervisor), *Developing and applying novel dendrochronological methods to understand snowgum dieback in the Australian alpine region*
2023– J. Harrison, The University of Melbourne (PhD, associate supervisor), *Developing and testing novel data assimilation algorithms for direct integration of palaeoclimate and climate model data*
2022–2025 P. Cho, University of Notre Dame (PhD, associate supervisor), *Quantifying and understanding the imprint of the Indian Walker Circulation on precipitation isotopic variability in the Indian Ocean basin*

Teaching and supervision professional development

2024 Australian National University (ANU) Exploring Learning and Teaching course
2023 ANU Science, Health and Medicine Colloquium 'The Human Face of Teaching'
2022–2023 ANU Research School of Earth Sciences Education Forum

Publications
